-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a method of producing a reel for packaging, classified in class 264, subclass 261.
  - II. Claim 2, drawn to a product produced by the method of producing a reel for packaging, classified in class 242, subclass 608.8.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by a materially different process such as by fastening the core to the side walls with staples, strings, or other types of clips. Alternatively, the core material may be heated to form a bond between the core and the sidewalls to form the product in claim 2.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Billy Killough on 11/29/2005 a provisional election was made with traverse to prosecute the invention of group I, claim 1. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 1732

Claim 2 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rohe et al (US 3271498).

Regarding Claim 1, Rohe et al discloses a method of installation of moldable insert in sandwich panel comprising of forming a first sidewall 11 and a second sidewall 10 (see figure 1); placing a partition having a void therein of a generally circular cross section 15, adjacent to, and generally concentrically with, said first side wall (see figure 1); filling said void of said partition with a flowable material which will form into a solid core and which will adhere to said first sidewall and said second sidewall (Col 7 Line 69); placing said second sidewall 10 in a generally parallel and concentric relationship with said first sidewall 11 and against said partition 17, wherein said flowable material

Art Unit: 1732

adheres to said first sidewall and to said second sidewall and forms a solid core 15 (see figure 1).
